DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 and 34-38, drawn to a floor mat, classified in class 15, subclass 215.
 - II. Claims 12-27, drawn to a tacky insert, classified in class 428, subclass 343.
 - III. Claims 28-30, drawn to a method for manufacturing a tacky insert of a floor mat, classified in class 156, subclass 60.
 - IV. Claims 31-33, drawn to an apparatus for manufacturing a tacky insert of a floor mat, classified in class subclass 349.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and all have different functions.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1744

4. If Applicant elects the invention of Group I (floor mat), an election of species requirement will be made and Applicant must elect a single disclosed species as set forth below:

This application contains claims directed to the following patentably distinct species of the claimed invention: 1) Figs. 1,2, 2) Fig. 3, 3) Fig. 4, 4) Fig. 5, 5) Figs. 6,7, 6) Fig. 8, 7) Figs. 9,10,12, 8) Fig. 11, 9) Fig. 13, 10) Fig. 14, 11) Fig. 17, 12) Figs. 18,19,20, 13) Figs. 21,22, 14) Figs. 23,24C,24D,24E,26B,26C,26D, 15) Figs. 24A,24B, 16) Fig. 25, 17) Fig. 26A, 18) Figs. 27A,27B,27C, 19) Fig. 28,29A,29B,29C,30, 20) Figs. 31A,31B,31C,31D, and 21) Figs. 32A,32B,32C,32D,32E.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randall Chin whose telephone number is (703) 308-1613. The examiner can normally be reached on Monday through Thursday and every other Friday.
